

The BRS Experience

In the event of a breach, or *SUSPECTED* breach:

1. User calls the dedicated toll-free number, available 24/7, and provides the intake operator with some basic contact information.
2. CSR privacy professional (CIPP) calls user to collect information vital to determining:
 - a) What authorities may be involved and if they will require reporting;
 - b) If consumer notification will be required
3. CSR files all required reports to applicable authorities and provides user with summary. If consumer notification is required, CSR will complete the required notices with the user's input.
